WE CAN MAKE IT
—*if you want a quality product*

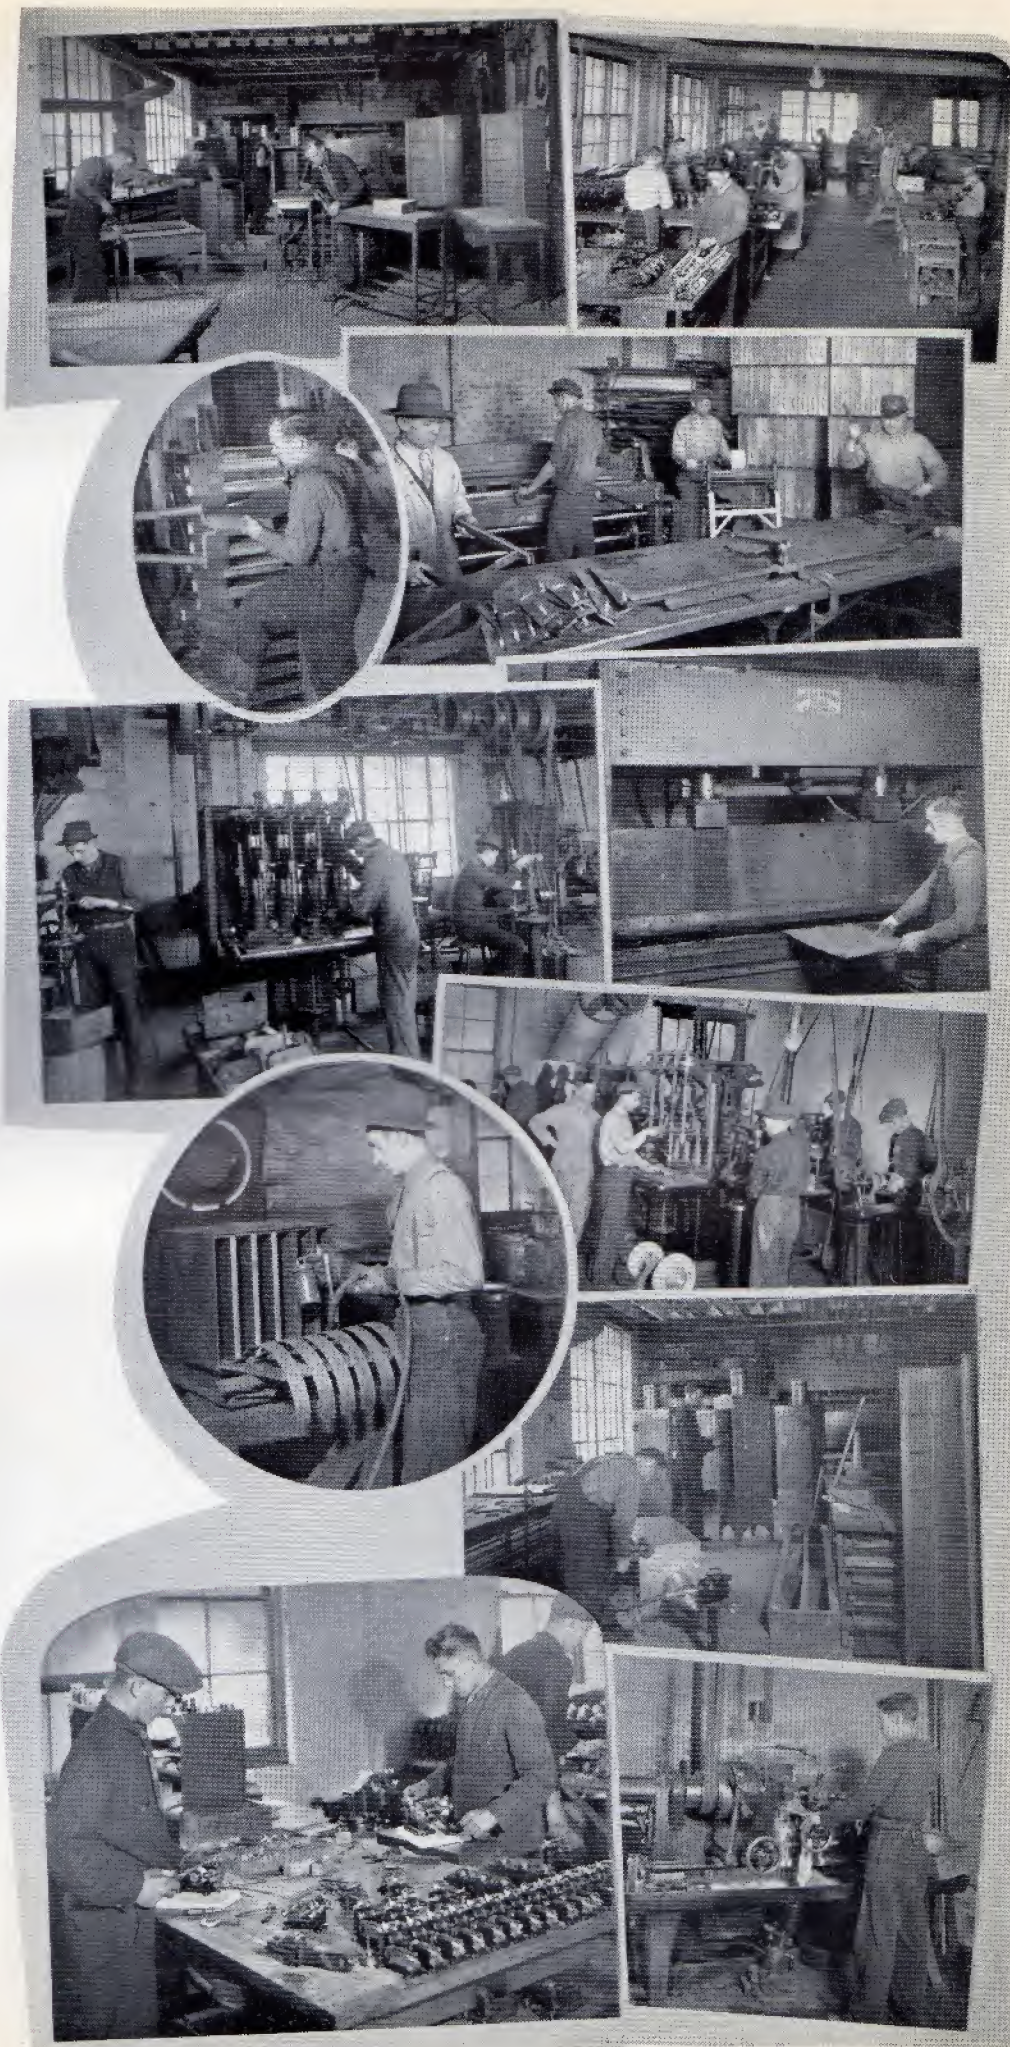

- We are equipped to meet machine and sheet metal needs of any nature, and for any industry.
- Our modern machinery enables us to execute *any* order to your unique specifications and individual needs, regardless of size, shape or quantity, with greater facility and quicker service.
- Products made in stainless steel, monel, copper, brass, sheet steel and galvanized, a specialty.
- Precision machine work is also a feature of this better service.
- Our many years experience in supplying theatres, laboratories, exchanges and studio cutting rooms has resulted in the wide assortment of stock tables, cabinets, sheet metal equipment and accessories illustrated. If the styles displayed do not meet your peculiar requirements—send a sketch with details and dimensions, and we shall be glad to submit quotation without further obligation on your part.
- Neumade Products are made of the best materials obtainable, and produced by only skilled mechanics.
- We are originators and designers of the products we manufacture.

WHERE *Neumade* PRODUCTS ARE BUILT

FAST, efficient quantity production of the Neumade line is carried on in a spacious factory in Buffalo, N. Y. Complete shop with precision equipment and a modern sheet metal shop occupies two floors covering an area of approximately 18,000 square feet, with separate departments for experimental work and drafting.

In Buffalo raw materials are available at lowest prices consistent with the high quality required. And from this strategically located lake and railway transportation point shipments can be made to any part of the United States and Canada with exceptional speed. *Most Neumade orders are shipped the same day they are received.*

From the corporation's main offices in the heart of New York City's film marketing activities, unusual service is rendered the large and rapidly increasing Neumade clientele. There's *immediate* delivery for customers in the New York metropolitan area on most items in the line from New York stock-rooms assembled to provide this special service.

And in these New York quarters, too, there's a shop expertly staffed to execute such special jobbing or manufacturing commissions as may be necessary to save time and money.

The "BEAUTY SPOT"

*A Powerful
Baby Spotlight*

COLOR WHEEL

Attached to any spot — slides into channel in front of lamp. It's on in a jiffy.

CW-1 \$3.00

PIPE CLAMP

Sure-grip Pipe Clamps affix the Beauty Spot in any conceivable position.

BC-1 \$1.75

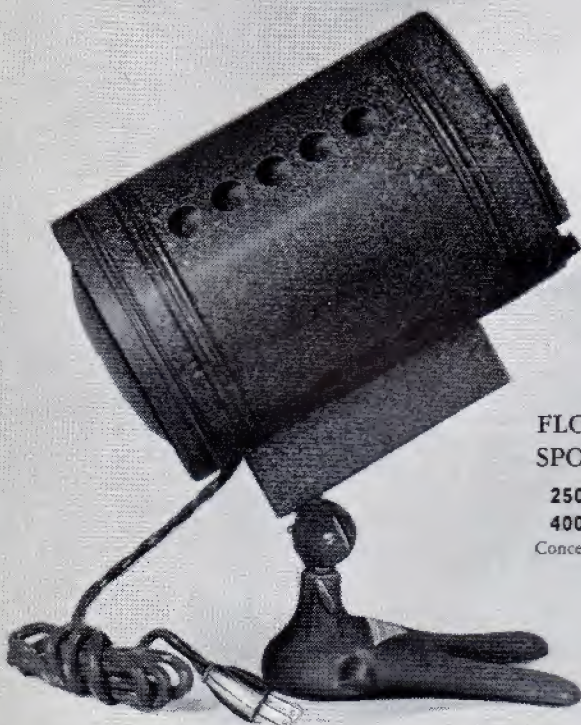

EXTENSION STAND

This heavy-based Extension Standard used wherever there is need to follow objects or for permanent "spotting." Stand adjustable from 40" to 63" in height. Adjusts to any angle.

BS-2 with Spot \$12.00

BS-3 without Spot 5.00

FLOOD and SPOT BULBS

250 Watt \$1.75

400 Watt 3.00

Concentrated Filament Type

CEILING BRACKET

For mounting Beauty Spots high, permitting fine results from concealed lighting brackets.

BC-2 \$1.00

Neumade "Beauty Spots" have everything they need to make them serviceable in the broadest possible field—and nothing to make them unduly expensive and hard to operate.

BS-1 \$7.00

with 250 W. Bulb \$1.75 extra

LIGHT . . COLOR . . MOTION *with*

MOTOCOLOR WHEEL

For those innumerable situations in which most effective sales results are effected through the use of displays—in theatres, night clubs, dance halls, retail stores, etc.—the NEUMADE MOTOCOLOR WHEEL, with Neumade Baby Spotlight, combines the three most powerful elements of advertising to fill a long-felt need. Fool-proof and absolutely dependable in operation. Easy on electric current. Low-priced. Simple to install. Six colors to the frame—and a wide assortment from which to select.

MW-1 \$12.00

MOTOCOLOR UNIT

Beauty Spot with Motocolor Wheel. Automatic 6-color change in one minute. Wheel operated by small AC 60-cycle 110-Volt motor.

BS-4 \$17.00

COLOR HOOD

To give constant color transformation through gelatine screens. Hood snaps on easily with spring lugs. Gelatine sheets easily renewed. Extra gelatines 10c each.

CH-1 \$1.25

PIPE CLAMP

To attach Sunlite Flood to any cylindrical support 3/4" to 2" in diameter.

PC-1 \$1.50

SUNLITE FLOOD

Compact, sturdy, simple in construction. For marquee flooding. To light dangerous dark spots where costly accidents occur. For lighting auditoriums for cleaning purposes; fine for photographic studios. Parabolic reflector 9" in diameter, 7" deep, brushed aluminum finish inside; rubber cord and plug.

SF-1 \$7.00

RUBBER CABLE

5c per ft.

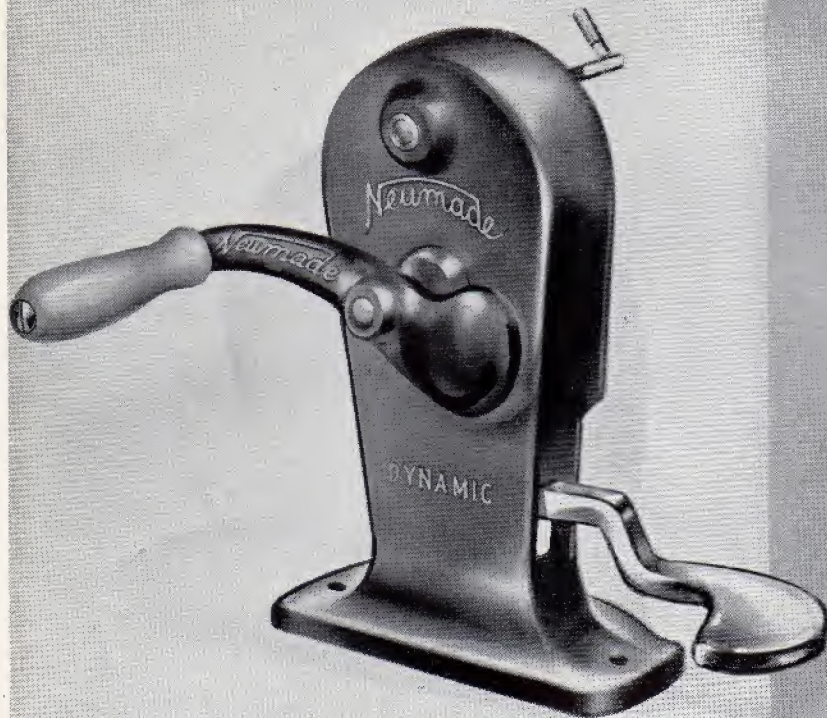

Approved, heavily covered. Necessary where Sunlite Flood is used for auditorium cleaning, any desired length, minimum 30 ft, each length with male and female covered plug.

SUNLITE UNIT

Stand has 12" circular cast iron base, adjustable 40" to 63" in height. Swivel collar, controlled by thumb screw allows Sunlite Flood to swing freely in complete circle. Tilting adjustment on lamp proper. With 50 ft. of cable.

SFU \$14.50

"DYNAMIC" Leads the Line of NEUMADE REWINDERS

**Geared End
with Brake
\$14.00 each**

A precision rewinder for a new need is the DYNAMIC, and was primarily developed for use with the 2000 foot reels.

The superiority—and popularity—of Neumade Rewinders has been achieved through Neumade's manufacturing policy of meeting—or anticipating—the constantly changing demands of the industry it serves.

Across the years there have been successive models. Each model has been the best in the light of the industry's advancement and requirements. Interspersed have been special designs for highly specialized use.

The DYNAMIC is Neumade's latest achievement in the rewinder field and each one carries a five year guarantee.

\$26.00 the SET

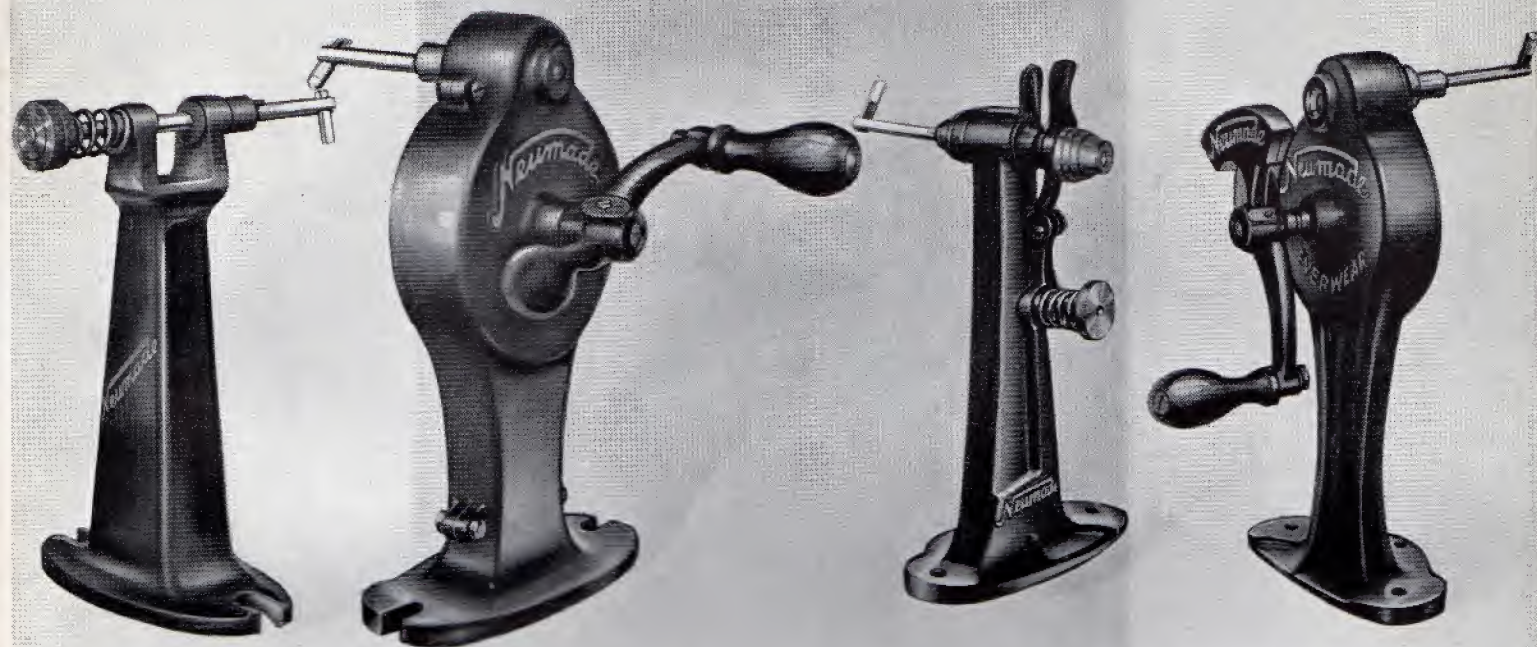

DYNAMIC CONSTRUCTION

- 1** Sturdy cast housing of stream-line design, with three-point-type base absolutely prevents rocking.
- 2** Counter-balanced crank, with full-grip wooden handle, the end of which is counter-sunk and enclosed—there can be no pinching or blistering the hand.
- 3** Entire drive-unit of heat-treated steel. Both master and pinion gears machine cut and precision fitted. Special two-piece shaft and pinion gear construction which eliminates play.
- 4** Norma-Hoffman precision, ground ball-bearings which require no oiling. Races grease-packed and sealed.
- 5** New type reel-locking jack, or finger, with ball-and-spring catch which holds reel on at highest possible speeds. They can't fly off.
- 6** Gear ratio, two and one-half to one, which handles a full 2000 foot reel with ease. Also furnished four to one ratio where needed.
- 7** Made in geared ends only.

**Geared End
without Brake
\$12.00 each**

A REWINDER *Model to Suit Any Requirement*

No. 1 BENCH TYPE

Simple, sturdy construction; perfectly cut gears; smooth running. With our own designed patent locking jack, which prevents reel from flying off. Made for 10" reels.

Dummy End—\$2.75

Geared End—\$4.75

\$7.50 the SET

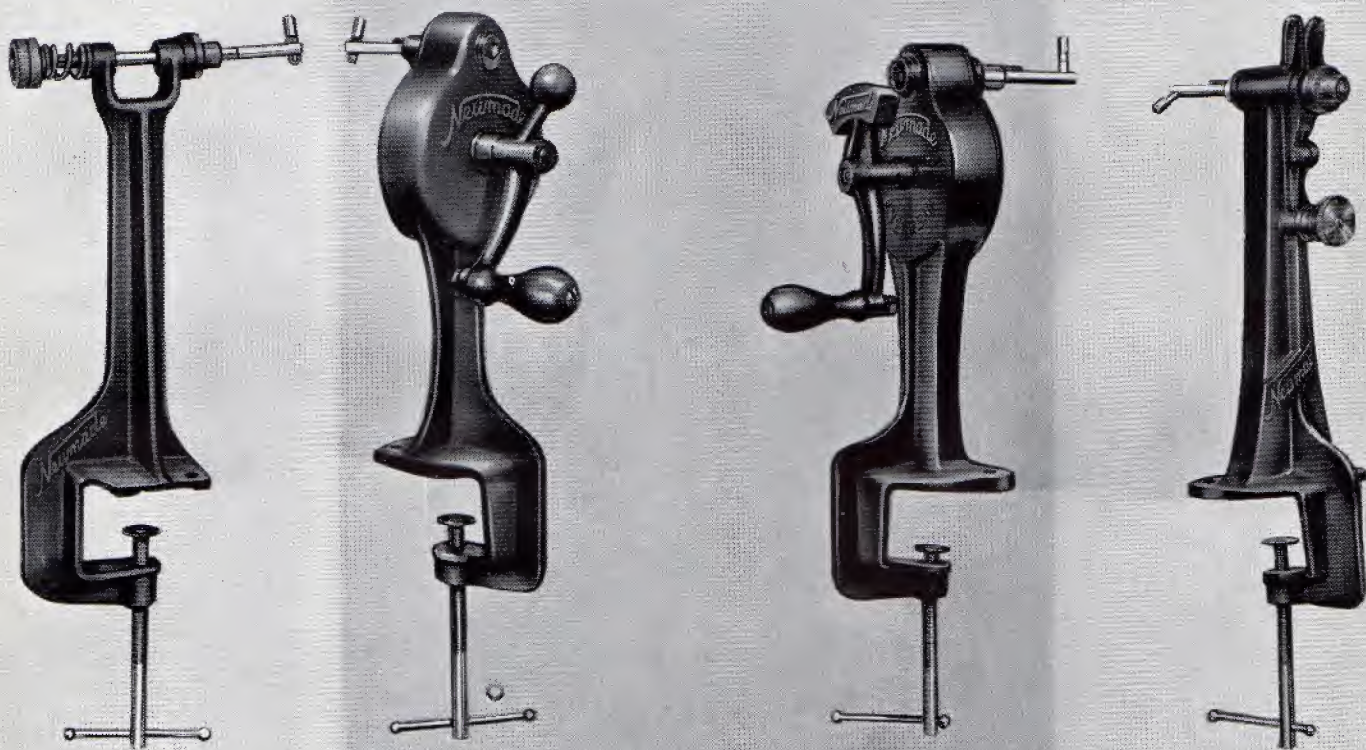

No. 3 EVERWEAR

Heavy construction throughout. Steel cut gears. Balanced crank handle. Half-inch reel shaft bearing insures long life. Patent locking jack. Dummy End equipped with special tension. Three point base insures rigidity. Accommodates reels up to 18" in diam.

Dummy End—\$3.50

Geared End—\$6.50

\$10.00 the SET

No. 2 CLAMP TYPE

Built for general use, having light channel reinforcement with strong clamp arm. Takes up to 18" reels.

Dummy End—\$3.25

Geared End—\$6.75

\$10.00 the SET

No. 4 EVERWEAR (Clamp Type)

Same general construction features as Everwear No. 3. Heavy channel reinforcement and sturdy clamp arm.

Dummy End—\$4.50

Geared End—\$7.50

\$12.00 the SET

REWINDERS *for* SPECIAL USES

There's a Neumade Model Ideally Suited to Any Situation Common to the Motion Picture Industry

Geared end with brake
\$10.00 each

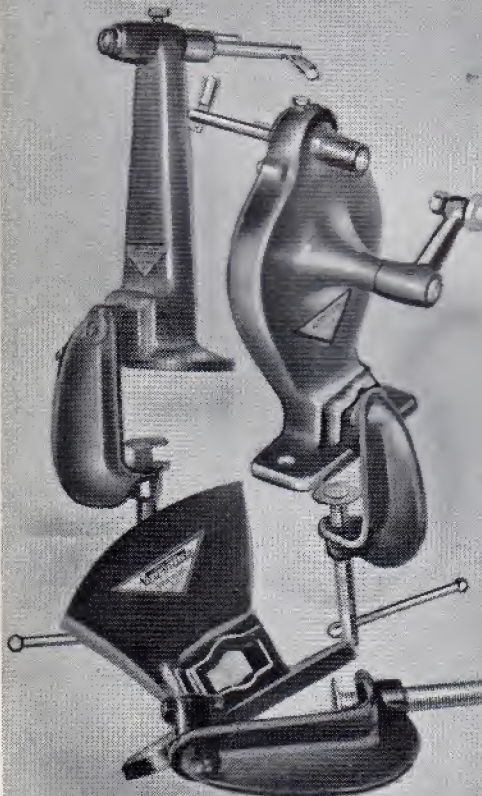

The GIANT

The same big sturdy appliance as the Dynamic, without ball-bearings. Built to stand the strain of the heavy 2000 foot reels. Entire drive unit, including shaft and gears, of heat-treated steel. Equipped with half inch bearing shaft offering minimum of wear. Three-point-type base. Gear ratio two and one-half to one for easy handling of 2000 foot reels. Also can be furnished with four to one ratio if needed. The Giant Rewinder carries the same five year guarantee as the Dynamic.

\$18.00 the SET
Geared Ends Only

Geared end without brake
\$8.00 each

BABY No. 1

Highest grade materials and standard Neumade workmanship. Takes 1000 foot 35mm reels, or standard 16mm reels. Combination bench or clamp type. Packs flat—you can put the entire set in an overcoat pocket.

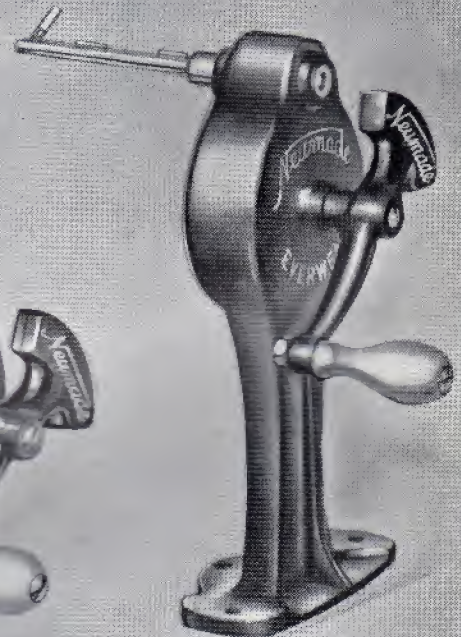

Dummy End \$2.50 Geared End \$4.00
\$6.50 the SET

SYNCHRO DUAL No. SD-1

Everwear general construction features. Tall enough to take 2000 foot reels. Shaft length for two reels (longer on special order). A friction clip, which rides the shaft between the reels, and a leather faced friction hub, with locking knurl nut on the end of shaft to hold reels firmly in position. The friction devices insure even tension and pick-up. Invaluable in any condition where two reels are being handled at the same time.

Geared Ends Only
\$35.00 the SET

DUAL No. 5-A

Everwear construction. Equipped with elongated shaft, having two keys to permit the winding of either one or two reels.

Geared Ends Only
\$20.00 the SET

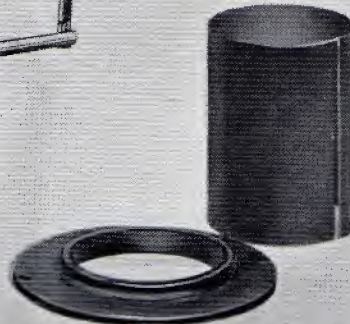

Theatre — NEEDS

DYNAMIC MOTOR-DRIVE GEARED END & BRAKE DUMMY

Dynamic Rewinder equipped with aluminum pulley, anchored to $\frac{3}{8}$ " master gear shaft. Can easily be attached to motor under or at side of the table. Dummy end equipped with special side tension brake.

\$22.50 the SET

ROSS LENS HOLDER AND SPLIT ADAPTER

L-321 (Holder) \$2.00

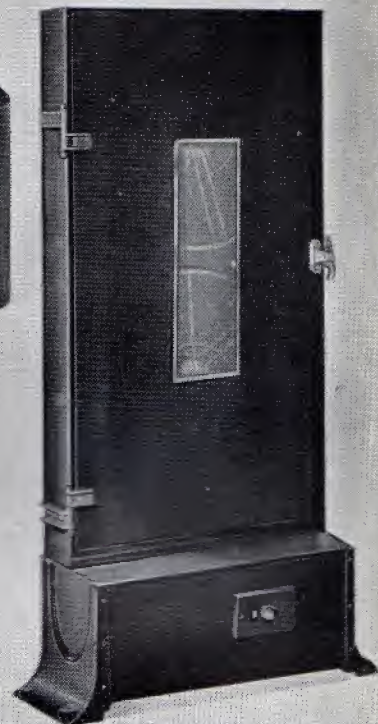

L-322 (Adapter) 1.00

HAND TALLY

Fits snugly in the palm of hand. Numbers easily tripped with thumb pressure. Reset knob at side. A necessity in checking house attendance.

Price \$5.00

NEUMAIDE AUTO- MATIC REWINDER

With hermetically sealed motor tightly enclosed in steel plate base. Cast motor case; view panel of heavy clear wire glass; fittings chromed, and sturdy hinges are of our own design. Equipped with two switches,—the first prevents re-winder from operating unless door is tightly closed, second shuts off current when rewinding has been completed or film has broken. Takes reels up to 16". Motor $\frac{1}{4}$ H. P., 1750 R.P.M. Standard equipment A. C. current—equipped with D. C. motor, \$5.00 extra.

Price \$125.00

REWINDER PULLEYS

Cast aluminum, carefully machined. Steel bushings to fit all styles and sizes of Neumade Rewinders supplied with each pulley.

RP-3 (6") \$4.00

**T-165
SHIPPING TABLE**

Of extra heavy construction, having 10 gauge plate steel top. Size, 8' long, 34" wide, 30" high. Reinforced underneath. Two set-in channel slide drawers, size, 24" long, 16" wide, 4" deep. Heavy gauge reinforced shelf at bottom.

\$110.00

FUME-TITE

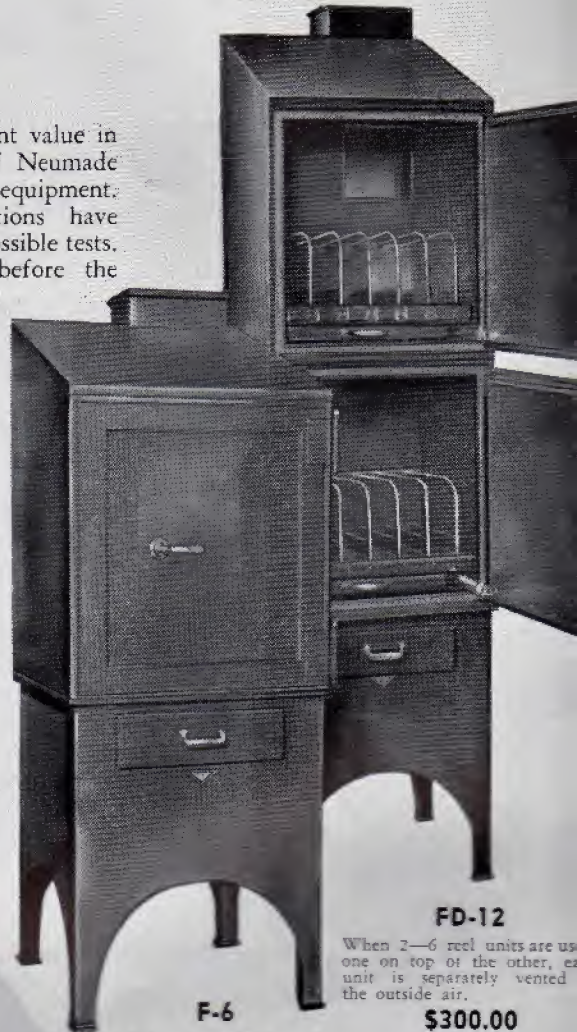

FILM VAULT

With Sprinkler Head

F-12

Takes 12—2000 ft. reels, in two tiers of six each. Approved, quick-fusing sprinkler head enclosed in heavy gauge wire mesh. Water feed line $\frac{3}{4}$ ". Door can swing from either side; specify when ordering. Full dimensional drawing may be found on page 47.

\$300.00**FD-12**

When 2—6 reel units are used, one on top of the other, each unit is separately vented to the outside air.

\$300.00**F-6**

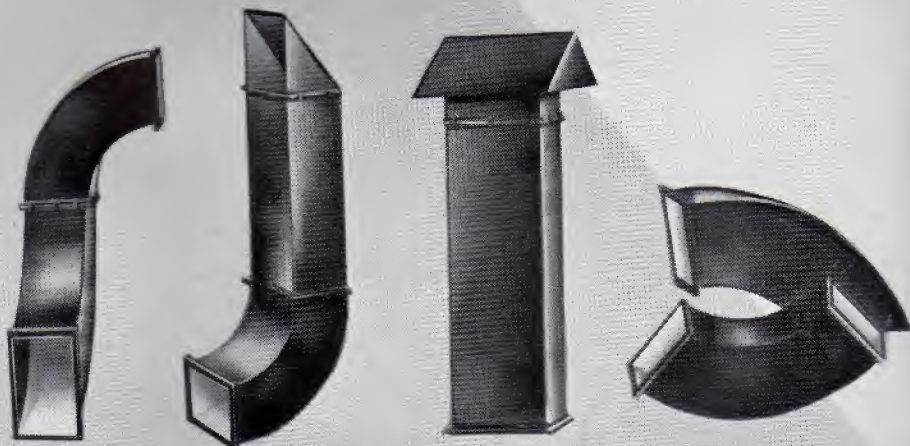

Takes 6—2000 ft. reels. Requires no sprinkler head.

\$165.00

There's real economy in the installation of the Neumade FUME-TITE FILM CABINET. Careful examination by fire and insurance authorities in any section of the United States will disclose that the FUME-TITE more than meets all legal requirements and it follows that theatres using this most modern booth storage equipment save in lower insurance rates than where inferior equipment is used. FUME-TITES are sold for installation in New York City on a guarantee that insurance reductions will be effected.

CONSTRUCTION FEATURES

- 1—Constructed throughout of 18 gauge steel, with all joints welded.
- 2—Precision-fitted, fume-tight, double-sealed door, sealing channels asbestos lined.
- 3—Equipped with never-failing plunger type door-pull with adjustable tension.
- 4—Three-point automatic door-locking device of our own design. Door closes and locks automatically.
- 5—Equipped with approved quick-fusing sprinkler head protected by heavy gauge non-rusting wire mesh enclosure.
- 6—Double-wall construction throughout filled with $1\frac{1}{2}$ " of poured approved plastic heat and fire-resisting compound.
- 7—Equipped with vent, 8 x 10" (More than required by underwriters law). Double protection against the accumulation of dangerous fumes or gases.
- 8—Slanting top—discourages the tendency to use any flat surface as a place on which to pile miscellaneous articles.
- 9—Utility drawer for tools, etc., is provided in sub-base.
- 10—Standard finish, baked-on (two coats) olive gray enamel. All hardware chrome plated.

Vent pipe for Neumade FUME-TITE FILM CABINETS is made in standard lengths and units to meet every installation requirement. Vent elbows—\$15.00 each. Straight vent—\$5.00 per foot. Horizontal rain-hood—\$8.00. Vertical triangle-shape rain-hood—\$10.00.

FIRE CHIEF

FILM CABINET

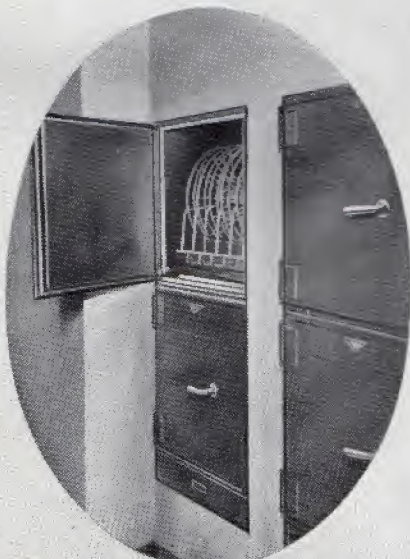

FC-1

Takes 12—2000 ft. reels in two tiers of six each. Approved, quick-fusing sprinkler head, enclosed in heavy gauge wire mesh. Water feed line $\frac{3}{4}$ ". Full dimensional drawing on page 47.

\$205.00

Complete with one length of vent pipe

Neumade film storage equipment in the Music Hall, Radio City, New York, where every appointment was the result of the most searching scientific investigation. 14 Fume-Tite Cabinets were installed in Radio City.

The Fire-Chief and the Fire-Safe have been manufactured to meet the price requirements of those not at the moment disposed to install the Fume-Tite. Installations of this cabinet in New York City have been approved and insurance reductions allowed. There has been no stinting in care or quality of materials used in these less expensive cabinets. They are the best that can be bought for the money.

Neumade film storage equipment in a Federal Penitentiary—where things must be doubly safe, since the customers can't "walk—don't run"—to the nearest exit.

FIRE SAFE

CABINET

These cabinets have the same film capacity as the F-12. There are double walls of heavy-gauge steel plate—but air space instead of fire-proofing compound is depended upon for protection from heat and flame. Equipped with same approved, quick-fusing sprinkler head rig and the same precision-fitted door with infallible automatic three-point self-locking device and plunger-type adjustable self-closing door pull.

The fittings — including locks, hinges, door pulls etc. — are enamelled in the same finish as the cabinet itself. Baked-on olive gray enamel. The Fire-Chief and Fire-Safe are vented with a round steel plate pipe, standard 8" diameter. This vent is covered with inch-thick sheet asbestos.

FS-1

Takes 12—2000 ft. reels in two tiers of six each. Approved quick-fusing sprinkler head, enclosed in heavy gauge wire mesh. Water feed line $\frac{1}{2}$ ". See page 47 for detailed drawings giving overall dimension of these cabinets.

\$225.00

Complete with two lengths vent pipe

Special STORAGE EQUIPMENT for NITRATE FILM of EVERY VARIETY

Stock fire-proof, fume-tight steel vaults for larger quantities of motion picture film than are usually carried in the operation of a theatre.

Stock fire-proof, fume-tight steel vaults for the storage of flat nitrate negatives for straight photographic or X-Ray use. Custom-made fire-proof, fume-tight steel vaults to meet any requirement; prices submitted upon receipt of blue-prints, or sketches.

SPECIAL X-RAY FILM CABINET

Especially engineered and designed for use in the laboratories of hospitals, public institutions and doctors' and dentists' offices where the constant accumulation of nitrate cellulose X-ray negatives develops a very definite fire and explosion hazard.

Interior fittings, including perforated steel shelves, adapted for standard size negatives but available according to any lay-out plan given.

Eighteen gauge sheet steel, reinforced throughout. Double hollow walls, 1 1/4" thick. Approved sprinkler head protected with heavy-gauge wire mesh. Eight-inch round vent pipe. Double-walled hollow self-closing door with three-point automatic locking device, lock and two keys. Size—70" high, 36" wide, 18" deep.

Also suggested as equipment in research and testing laboratories of industrial plants.

Prices on Request

APPROVED FILM CABINET

75 Reel Capacity

For film exchange and general storage use. Eighteen gauge sheet steel, reinforced throughout. Double hollow walls 1 1/4" thick. Five angle racks to hold 10" reels in vertical position. Approved sprinkler head protected with heavy gauge wire mesh. Eight-inch round vent pipe. Self-closing double door with three hinges and 3-point automatic locking device; lock and two keys. Overall sizes shown on page 47 described in detail drawing.

C-75

\$250.00

APPROVED FILM CABINET

25 Reel Capacity

For film exchange and general storage use. Eighteen gauge sheet steel, reinforced throughout. Double hollow walls 1 1/4" thick. Three angle racks to hold 10" reels in vertical position. Approved sprinkler head protected with heavy gauge wire mesh. Eight-inch round vent pipe. Self-closing double walled door with 3 point automatic locking device; lock and two keys. See Dimensional Drawing page 47.

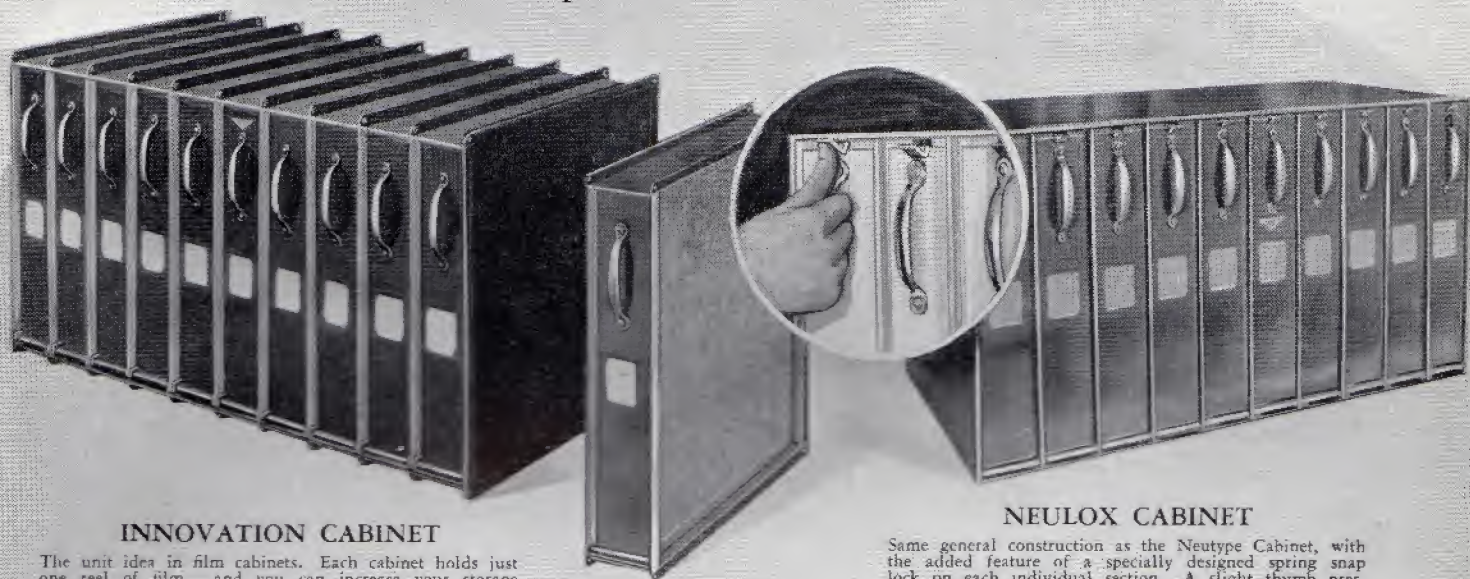

C-25

\$125.00

Popular UNIT STORAGE CABINETS

*"Innovation" ... "Neulox" ... "Neutype"
... "Sealtite"—Found wherever motion
pictures are shown!*

INNOVATION CABINET

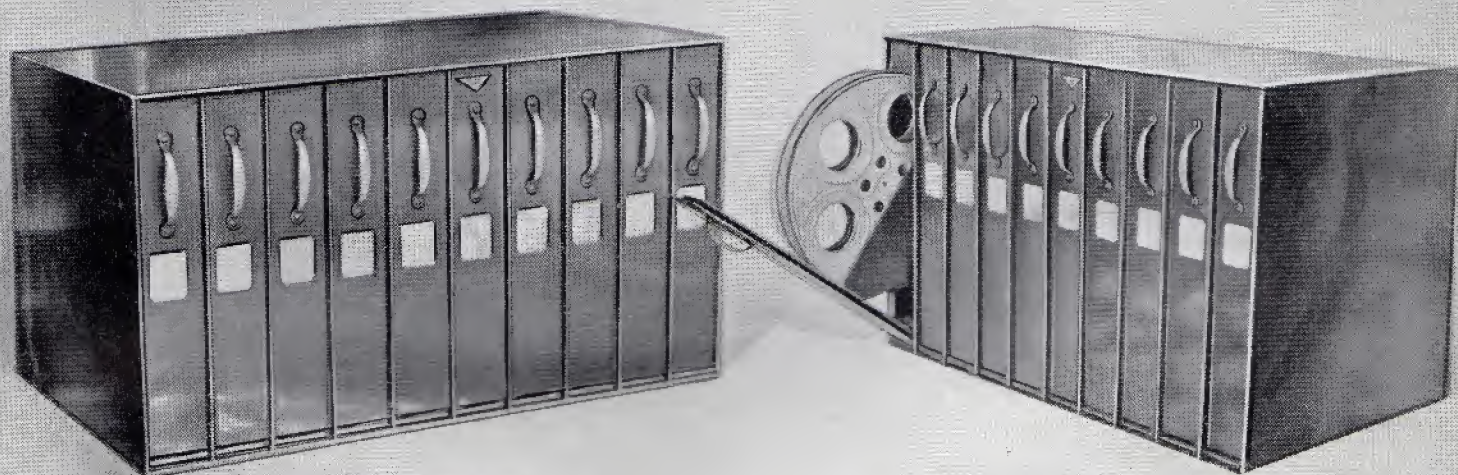

The unit idea in film cabinets. Each cabinet holds just one reel of film—and you can increase your storage capacity easily and inexpensively as the need presents itself. Four small bolts through outside flanges do the trick.

for 10" Reels, per Unit	\$4.00
for 11" Reels, per Unit	4.50
for 15" Reels, per Unit	4.50
for 18" Reels, per Unit	7.00

NEULOX CABINET

Same general construction as the Neutype Cabinet, with the added feature of a specially designed spring snap lock on each individual section. A slight thumb pressure releases lock. Will accommodate reels up to 15" diameter. Made in fixed units 5, 6, 8, 10 and 12 reels.

5 Reel Unit	\$17.50	10 Reel Unit	\$35.00
6 Reel Unit	21.00	12 Reel Unit	42.00
8 Reel Unit	28.00		

NEUTYPE CABINET

The Neutype is the least expensive in the line, and is attractive in appearance, as well as substantial in construction.

Made for 15" reels and in these sizes only:

5 Reel Unit	\$14.50	10 Reel Unit	\$29.00
6 Reel Unit	17.40	12 Reel Unit	34.80
8 Reel Unit	23.20		

SEALTITE CABINET

Gravity put to work! Slip the reel in—let the door go; that's all. The door closes automatically and stays closed! Special door stop allows doors to drop to just the right level and permits easy inserting and removal of reels. Sheet steel reel guards are welded to the carriage and door, adding rigidity to both, and thus closes in half the reel, giving film more protection. The Sealtite Cabinet is available in fixed units of 5, 6, 8, 10 and 12 compartments for 2000 ft. reels. Price \$3.90 per section.

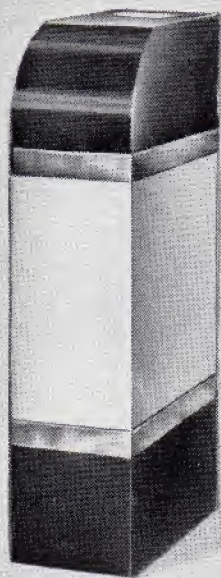

5 Reel Unit	\$19.50	10 Reel Unit	\$39.00
6 Reel Unit	23.40	12 Reel Unit	46.80
8 Reel Unit	31.20		

All Neumade sectional cabinets have safety air chambers separating each film compartment. Permanent reel carriages of heavy band steel riveted and electrically welded to the door. Neumade cabinets are constructed of heavier gauge steel and built like bank vaults. Each door is equipped with a full grip steel handle, solidly riveted into

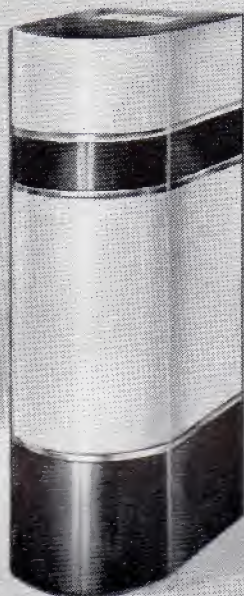

place. Each compartment door has its own card holder, with replaceable cards for indexing purposes. Standard finish, baked-on olive-gray enamel. Cabinets can be finished in blue satin and Morocco enamel to match projector and lamp house, at slightly higher prices.

THEATRE TICKET BOXES *in the Modern Manner*

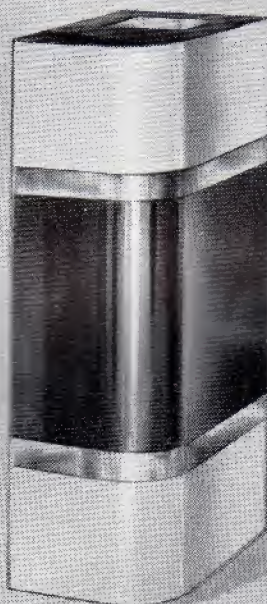

Smartly Conservative in Design • • • Steel Enameled

WAC-1

ACCESSORY CABINET

Wall or bench type of all-steel construction. Two reinforced self-closing doors with handle lock device. Six shelves with front edge turned up. For storage of booth accessories. Size, 56" high, 24" wide, 6 1/4" deep.

\$35.00

WTC-1

TITLE AND SEAL CABINET

Wall or table type. All steel construction. Reinforced, self-closing door with snap lock catch. Equipped with four shelves and memorandum holder fastened to inside of door. Size, 22" high, 15" wide, 4" deep.

\$22.00

S-551

GELATINE CABINET

For storing gelatine sheets—keeps them moist and flexible. Twelve drawers, each 24" x 22" x 1" deep. Push hole at bottom of each drawer to lift sheets. Brass index card holder and two handles on each drawer. Overall height, 16".

\$65.00

CARBON CABINET

S-309

Three bins for carbons, 6" x 5" x 10", and one 6" x 12" x 20" with tool drawer at bottom, 6" x 12" x 18". An additional spacious compartment with hinge cover for miscellaneous tools, etc. Overall size, 12" x 18" x 24" long.

\$35.00

S-320

UTILITY CABINET

Designed for many needs in the office or workroom, for photographs, cuts, and other accessories. Ten drawers, each 10" wide by 15" long and 1" deep. Overall height 14".

\$15.00

S-317
CARBON
CABINET

\$18.00

Overall size, 18" x 10" x 10". One drawer at bottom 4" deep. Two carbon compartments 4" x 10" x 10".

S-318

CARBON CABINET

(Wall Type) Overall size, 6 3/4" wide, 20 1/2" long, 24" high. Has two compartments 6 3/4" wide, 20" long, 8" high. Other two have same height and width but are 10" long.

\$20.00

S-319
CARBON
CABINET

\$28.00

(Floor Type) Overall size, 7 1/2" wide, 24" long, 39" high. Has four carbon compartments all 7" wide and 7" high. Lengths are 6 3/4", 10 1/2", 13 1/2", and 24". Tool compartment measures 7" wide, 17" long, 7" high.

General Utility STEEL CABINETS

No. 3684

COUNTER HEIGHT CABINET

36" wide, 18" deep, 42" high. 3 Adjustable shelves, 2 doors. 16 gauge counter top, over-hanging 1" front and rear. Linoleum top can be furnished at slight extra charge.

\$47.00

These cabinets finished in olive-green enamel; 3 point latching device with tumbler lock, and 2 keys. Handles chrome plated. Equipped with removable shelves.

No. 3487

GENERAL STORAGE AND UTILITY CABINET

4 Shelves, double doors, large storage capacity, sturdy construction and trim appearance. Size 36" wide, 18" deep, 78" high.

\$43.00

No. 3447

Same as No. 3487, except cabinet is 24" deep.

\$48.00

No. 2409

A single-door wardrobe of convenient size. 24" wide, 18" deep, 78" high. Contains hat shelf, coat rod and rust proof clothes hooks.

\$34.50

This cabinet can be supplied without coat hooks and with four extra shelves, for use as a general storage cabinet.

\$36.00

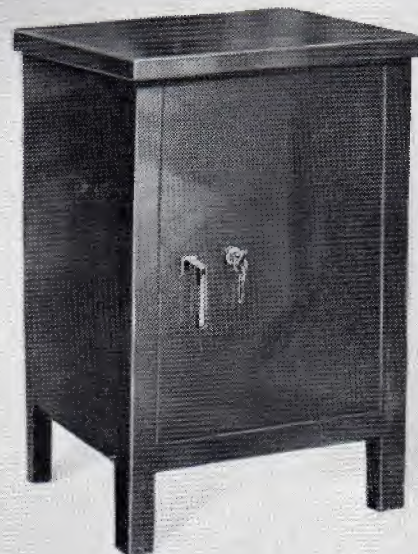

No. 5487

GLASS DOOR CABINETS

36" wide, 18" deep, 78" high. An ideal storage cabinet for books, instruments, trophies, collections of various sorts, laboratory supplies and chemicals. Four adjustable shelves, glass panelled double doors.

\$75.00

No. 1804

DESK HEIGHT CABINET

18" wide, 20" deep, 30" high. Two adjustable shelves. Swinging door, hinged on right side. Linoleum top can be furnished at small extra charge.

\$24.00

There Must Be a SPLICER Wherever Film Is Handled

— and the superiority of
GRISWOLD SPLICERS
has remained unchallenged
for a quarter of a century

MODEL R2

(Illustrated)

For use in theatres, exchanges, studios and laboratories. Three different overlaps— $5/32"$, $1/10"$ and $1/16"$. $5/32"$ is most generally used, and constitutes a full sprocket hole. Other sizes are preferred when film to be spliced is negative stock. Please specify overlap when ordering.

\$22.50

GRISWOLD MODEL T

—is a specialty item prized by film handlers who choose to pay a slightly higher price for refinements which make film-splicing particularly easy. It has a small electric light bulb imbedded in the base at the point where light is most needed in splicing; power is supplied by a small dry cell obtainable anywhere.

\$37.50

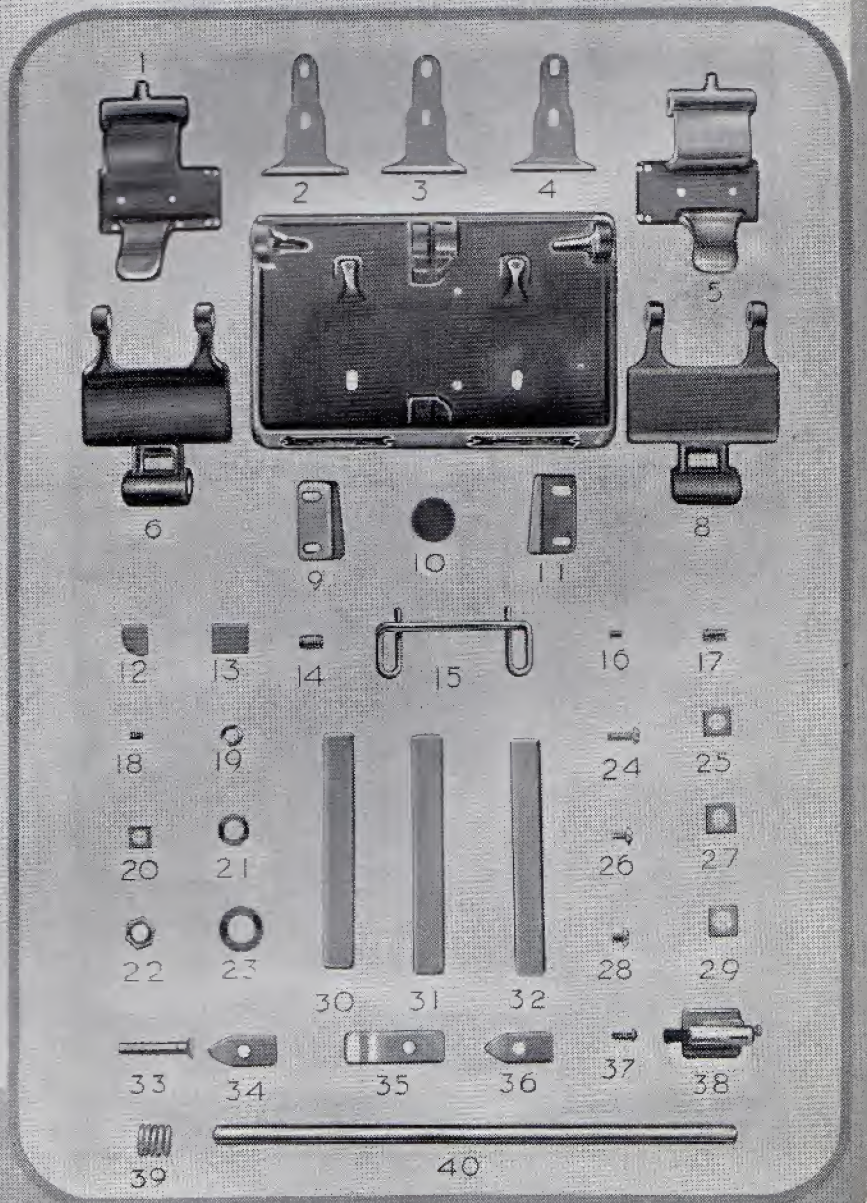

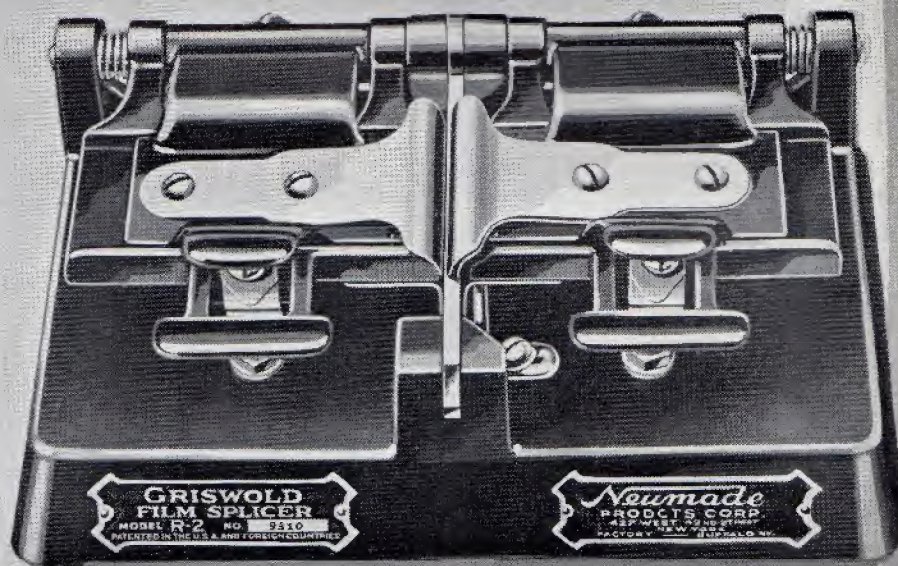

The model of the machine you are using is plainly marked on the descriptive plate on the front of the base of your machine; please mention it in ordering parts. . . . Parts marked (*) also apply on Model T. . . . Be sure to give width of lower Shear Blade—is it $5/32"$ full hole, $1/10"$ half hole or $1/16"$ quarter hole?

T-150
TIMING TABLE

Specially designed table for timing negatives, with white porcelain, acid-resisting top 42" long, 18" wide, 28" high. Translucent glass viewing panel 4" x 8". Movable reel standard projecting from the side of table; guide rollers keep film in alignment at an equal distance from the glass. Light switch conveniently placed at the side. Without rewinder and flange.

\$65.00

T-150A
PORTABLE TIMING STAND

Same type as shown opposite, and can be used on any table. Primarily used for small hand rolls of film. Timing card clip provided for holding such cards or notes.

\$28.00

T-152
PORTABLE MOVIOLA STAND

Rigidly built to withstand machine vibration. Legs fitted with two swivel and two stationary ball-bearing rubber casters.

\$22.00

T-132
PROJECTION TABLE

For portable projectors, stereopticons or effect machines. Rigidly built with reel rack and shelf underneath, having tilting top which lifts by use of worm screw. Size, 18" wide, 34" long and 34" high, with a 6" tilt.

\$35.00

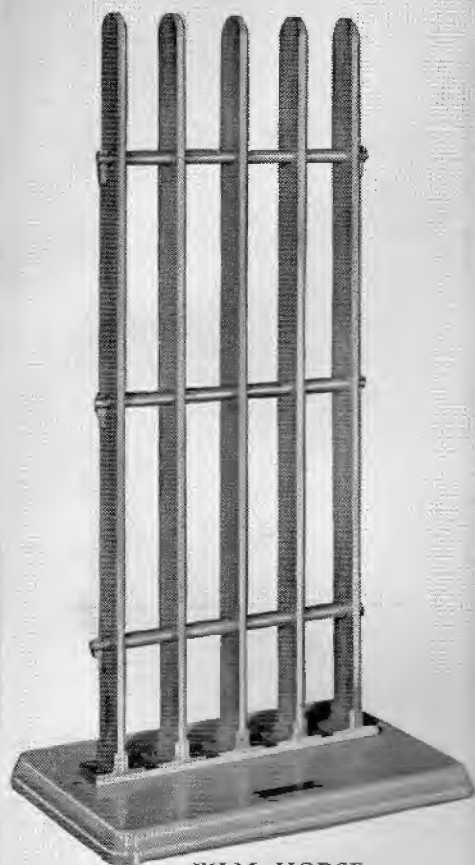

T-151
SPECIAL CUTTING AND VIEWING TABLE

This double table has two light boxes with two translucent reflector glasses. A light switch on front apron. One drawer on each side of table and a reel rack on top. Table size, 28" wide, 42" long and 30" high, with an auxiliary shelf which can be raised to increase length of the table by 12".

\$70.00

Film-Handling NECESSITIES

FILM HORSE

For cutting or short subjects. Permits the handling of 12-300 ft. rolls simultaneously. Cross bars can be removed to accommodate larger footage rolls.

FH-5 \$30.00

FILM HORSES

For the convenient handling of demounted film. Accommodate rolls up to 15" in diameter. Outside stanchions with bottom spring hinge and clasp. Bottom plates drilled for table bolts.

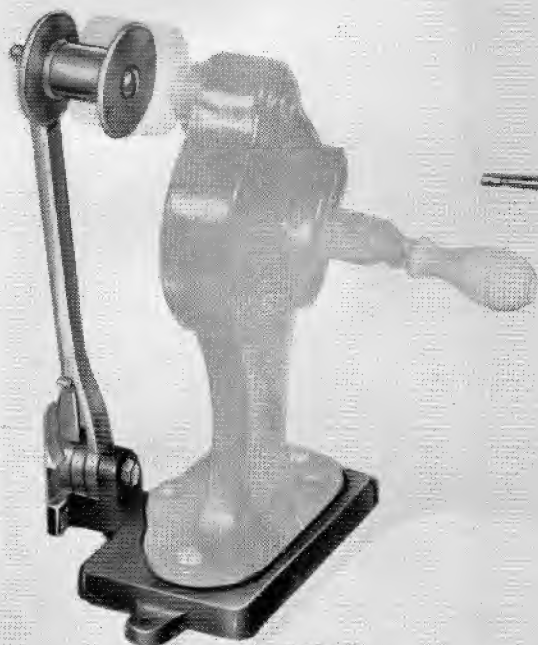

FH-1	(Single 1000')	\$ 6.50
FH-2	(Double 1000')	8.00
FH-3	(Single 2000')	10.00
FH-4	(Double 2000')	12.00

EDITING RACKS

Made to fit fibre barrels. Rack rim fits barrel top, cross bars have projecting, blunt pointed pins to keep film strips in order. These bars and pins have a smooth, chrome-plated surface. When ordering give barrel dimensions.

ER-1	(18" high)	\$13.00
ER-2	(36" ")	14.00

TITLE-WINDER

Device for rewinding film evenly without reel or flange. Especially adaptable for use with negative or positive raw stock. Base, arm and roller aluminum cast. Supplied with brass hub to fit on reel shaft of rewriter and provided with key and slot to hold bakelite core.

TW-1 \$18.00
Without rewriter

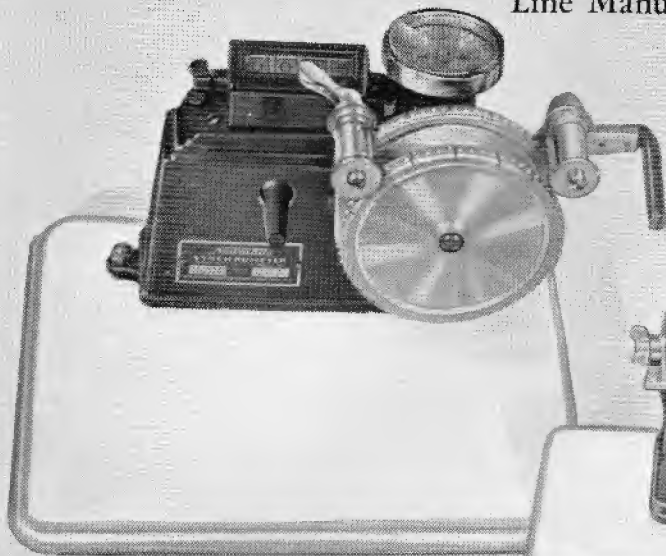

No. 3 BB REWINDER

Everwear construction details with ball-bearing feature added. Shaft rides in unit hardened steel ball-bearing racers forced onto the shaft under such pressure that shaft and racers are practically one piece. Light running, silent, everlasting.

Geared Ends Only \$8.50 Each

Synchronizing MEASURING MACHINES

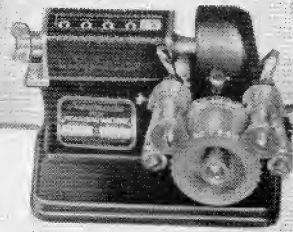

The Most Varied and Complete
Line Manufactured

M-80 SYNCHROMETER

Counter measures footage, and separate clock dial indicates frames and sprocket holes. Equipped with 64-tooth, aluminum, precision machined sprocket hub, which measures one foot every complete revolution.

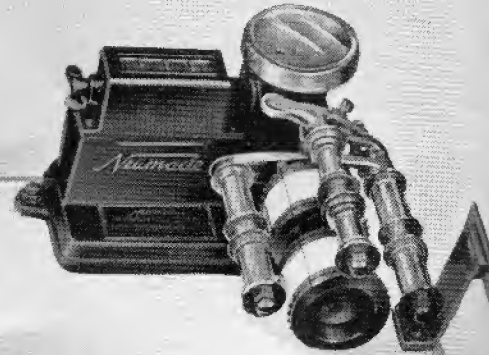

M-80-S (1 hub)	\$125.00
M-80-D (2 hubs)	135.00

M-38 MACHINE

Five-digit counter measures both footage and frames. Single eight-frame sprocket hub in chrome with frame slots to make cutting easy.

M-38-S (1 hub)	\$ 45.00
M-38-D (2 hubs)	65.00
M-38-T (3 hubs)	85.00
M-38-Q (4 hubs)	105.00

SYNCHRONIZER

Same construction as M-80 Synchrometer, with the exception that the hub has 32 teeth and measures 8 frames per revolution. Extra tension roller prevents jumping of film.

Single hub model	\$125.00
Double hub model	135.00

Cast base mechanism and gear housing on all type machines finished in black enamel. Guide and tension rollers, and other trim chrome plated. Each machine is supplied with an acid-resisting, light-reflecting, white porcelain base. Single and double machines carried in stock. Multiple sprocket models on special order at slightly higher prices.

M-75 SYNCHROMETER

For faster and safer measuring operations. Same type sprockets as on M-80 model—centres so high from base that film runs almost level from rewinders, eliminating pull and friction.

M-75-S (1 hub)	\$110.00
M-75-D (2 hubs)	120.00

MS-16 COMBINATION MACHINE

Device to measure reduction print negative and master positive with 35mm film. Equipped with one sprocket for 35mm film and two for 16mm. Checks both the 16mm width with the standard professional frame-for-frame, at the same time totalling the footage of the 35mm film.

MS-16	\$75.00

Measuring Machines and
Rewinders Available
on Special Order

**QUADRUPLE SYNCHRONIZING
OUTFIT**

For measuring from one to four films *simultaneously*. Equipped with M-80 Synchrometer machine, synchro rewinders and sub-base.

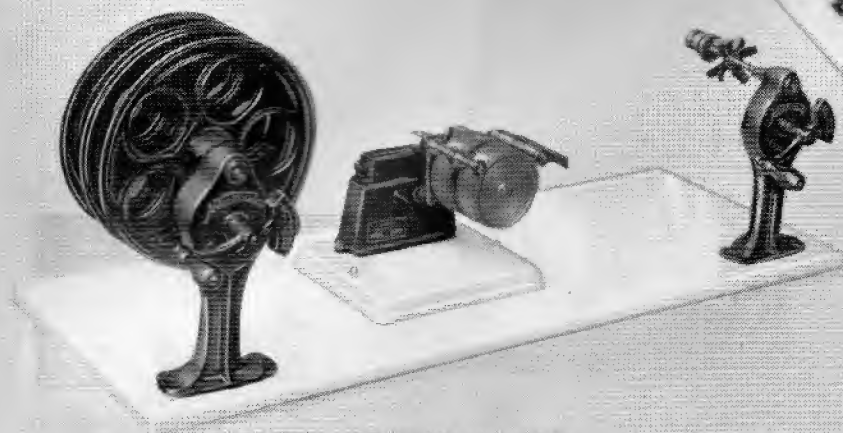

SR-80-Q \$265.00

**TRIPLE SYNCHRONIZING
OUTFIT**

Measures up to three films at one time. Equipped with M-75 Synchrometer, triple synchro rewinders and mounted on sub-base.

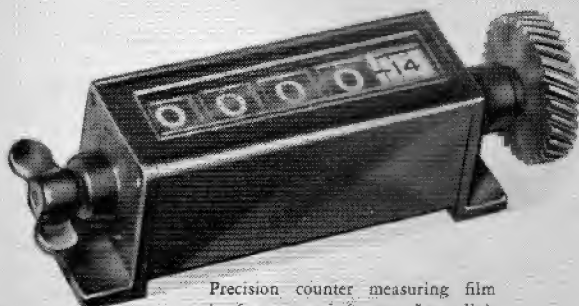

TR-75-T \$225.00

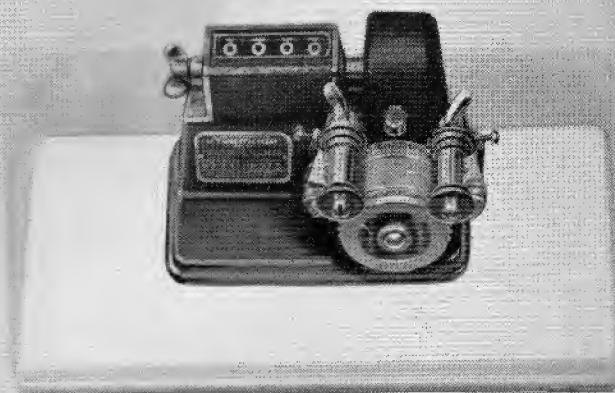

**DOUBLE SYNCHRONIZING
OUTFIT**

For measuring two films. Equipped with M-75-D Synchrometer and Synchro Dual Rewinders. Mounted on sub-base.

DR-75-D \$160.00

Precision counter measuring film in footage and frames. Last digit registers 0 to 15 for frames. Four and five-digit counters for measuring footage only, available. Counter supplied with or without spur gear.

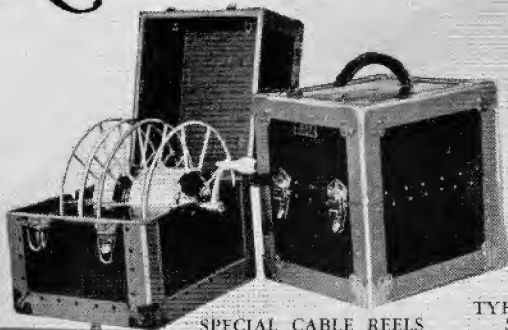

**M-37
MACHINE**

Has four-digit counter measuring footage only. Equipped with 8-frame sprocket, two revolutions measure one foot. Tension rollers on both sides of sprocket hub keep film firmly in place.

M-37-S	(1 hub)	\$35.00
M-37-D	(2 hub)	55.00
M-37-T	(3 hub)	75.00
M-37-Q	(4 hub)	95.00

BLOOP PUNCHES AND CUE MARKERS

"B.L.O.O.P!" is the jarring noise, inevitable, when the sound track is not properly blacked out at the splice. Accuracy and uniformity are essential in the sure elimination of bloop. With the use of mechanically accurate punches, the laboratory can be assured of no discredit for bloop in projection. Variable area and variable intensity of sound track require different types of punches. Therefore, we carry in stock punches with the cutouts as illustrated, or can make up any special design you may desire. In ordering stock bloop punches, use numbers shown under illustration. For special punches, send drawing giving length dimension and type of sound track.

FILM MUTILATORS

*"Duping" or Exhibiting
Neumade-Mutilated Film
Is Impossible*

These smartly designed machines — both hand and motor-driven models — destroy every inch of *picture* but save the value of the film stock and its silver content.

Each MUTILATOR is finished in crystal-black, baked-on enamel with drop-down door and positive-snap door lock, making it fireproof. MUTILATORS also have clean-out drawers.

All NEUMADE FILM MUTILATORS are delivered complete with bolts to fasten to any inspection table.

HAND DRIVEN

The perforated film sample at the right shows the simplest of the four perforations available in the hand-driven Mutilator illustrated directly above. This single cutter hubbed model is

No. FM-1 \$40.00

A double cutter hub is used in the second type, mutilating the sound track in addition to the picture. The double cutter hubbed model is

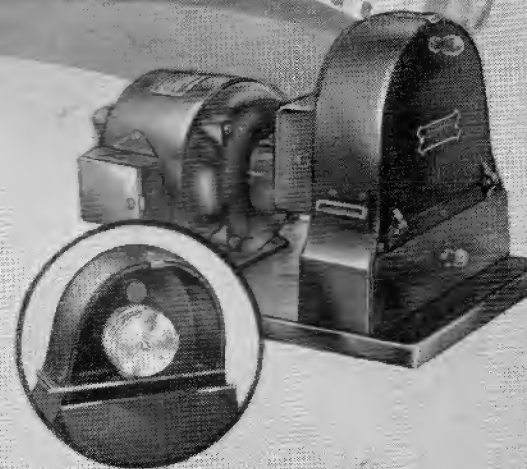

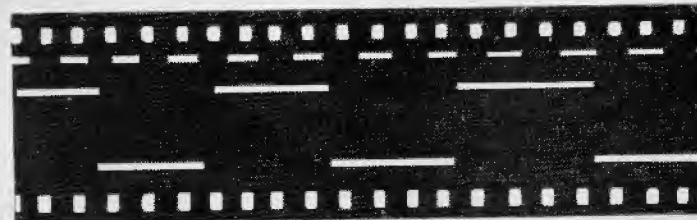

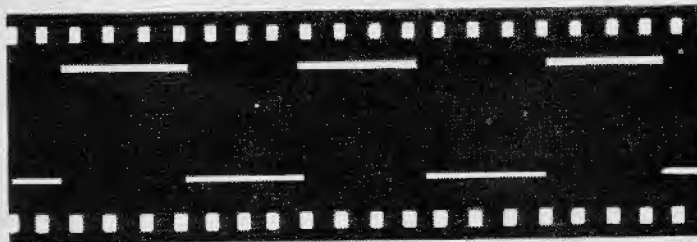

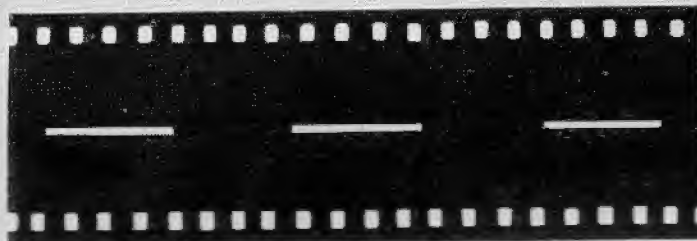

No. FM-2 \$45.00

Although the single perforation mutilates the film satisfactorily, the double and staggered perforations in the pictures shown at right make a more complete job of it. The staggered cutter hubbed model is

No. FM-3 \$45.00

In addition to the staggered perforations, the sound track is also mutilated in the fourth hand-driven model; a triple-sure process which makes it impossible to "dupe" or exhibit the film. The triple cutter hubbed hand-driven model is

No. FM-4 \$50.00

MOTOR DRIVEN

The motor-driven, Neumade Film Mutilator automatically feeds and mutilates the film, eliminating labor. Furnished with $\frac{3}{4}$ h. p., 110 volt, A. C., motor geared to operate at speed fast enough to insure perfect mutilation. The single cutter hubbed model is

No. MM-5 \$115.00

The motor-driven model equipped with the double cutter hub mutilating both the sound track as well as the picture as shown at the left is

No. MM-6 \$120.00

The staggered perforation is also available in the motor-driven model. The staggered cutter hubbed type is

No. MM-7 \$120.00

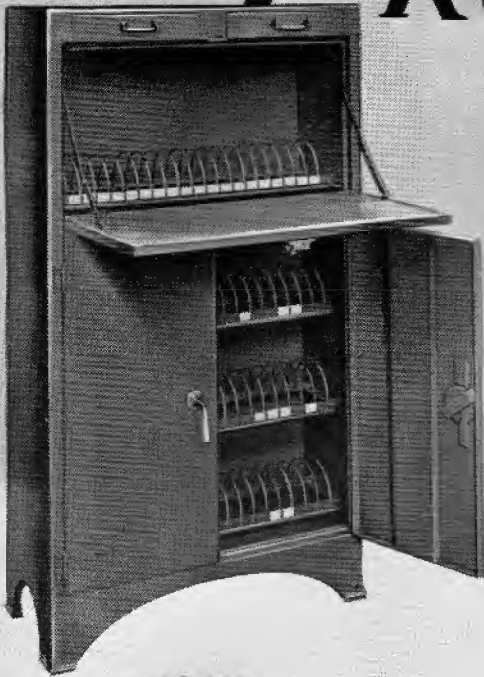

The motor-driven Mutilator with the triple cutter hub mutilating the sound track and staggering the perforations in each picture is the type most recommended. It combines automatic action with triple mutilation. It is suggested as the most practical Mutilator for general use in any exchange or laboratory. It is

No. MM-8 \$125.00

*You Can't Be Sure You've Killed a Print or a Negative Unless
You've Run It Through a Neumade Mutilator*

PROTECT YOUR 16 mm FILMS

They'll Last Longer

DC-175

As illustrated holds 80 reels, with or without cans. Overall dimensions 30 1/4" high, 28" wide, 11 1/4" deep. Top compartment 14" high, 28" wide, 11 1/4" deep. Drop door shelf 26 1/2" x 14". Lower compartment 26 1/2" high, 11 1/4" deep, 28" wide. Accessory drawers 11" x 11" x 2" high.

\$175.00

RAPIDLY increasing use of non-theatrical motion pictures has made their storage an important problem. Acetate, or "safety", film is susceptible to damage through careless storage. Average room temperatures, which change sharply during the course of any given day, will ruin safety film in a comparatively short period of time, particularly since the average safety print is so infrequently used.

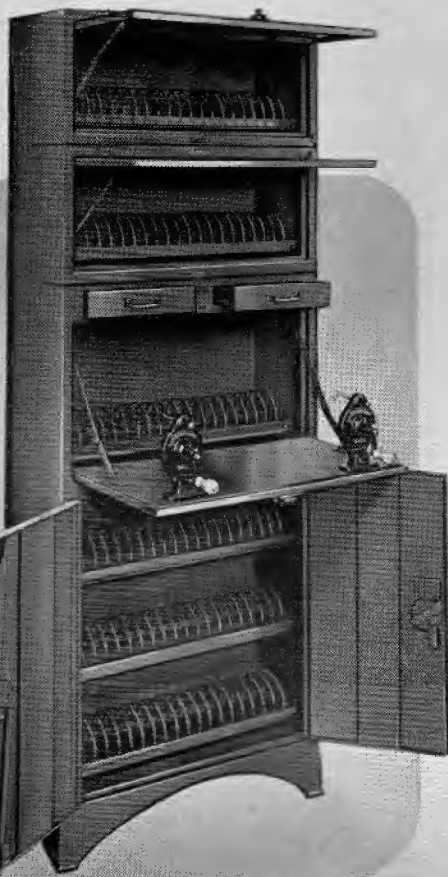

Tight enclosures in which temperature and humidity changes can be better controlled are an absolute necessity. There have been built into the Neumade line of storage cabinets for non-theatrical film the invaluable result of many years' experience in the manufacture of storage equipment for the commercial motion picture industry.

STORAGE AND WORK FACILITIES COMBINED IN A SINGLE CABINET

The basic unit is desk-type steel cabinet with a bottom compartment for straight storage purposes and a top compartment especially designed for more temporary storage while the film is being cleaned, spliced, or edited. Total capacity of the basic unit is eighty 400-foot reels. Dividers are spaced wide enough to allow storage in individual cans—which is always advisable.

Fittings and hinges on the drop leaf make it absolutely rigid when lowered for working purposes. It is covered with battleship linoleum, neatly bound in brass. Rewinders mounted on the drop leaf clear when the door is raised. Two drawers at the top of the unit are for tools and supplies.

Sectional units, providing additional storage space as the need develops, can be placed on top of the base unit.

DC-200

Same cabinet as DC-175 with twenty reel units mounted on top. Total reel capacity 140—400' cans or reels. Rewinders mounted on drop door shelf are two geared end baby type.

As Illustrated
Without Rewinders

\$225.00

DUST-PROOF TAMPER-PROOF FIRE-RESISTANT

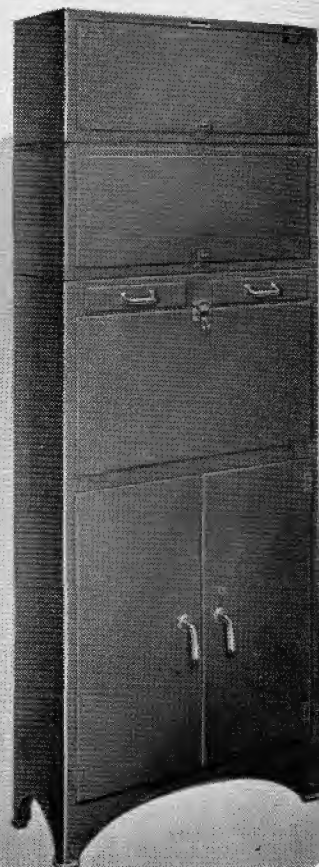

Absolutely tight construction — spot-welding instead of bolts — makes this fine cabinet dust-proof.

All three doors lock with both catches and keys—so it's tamper proof.

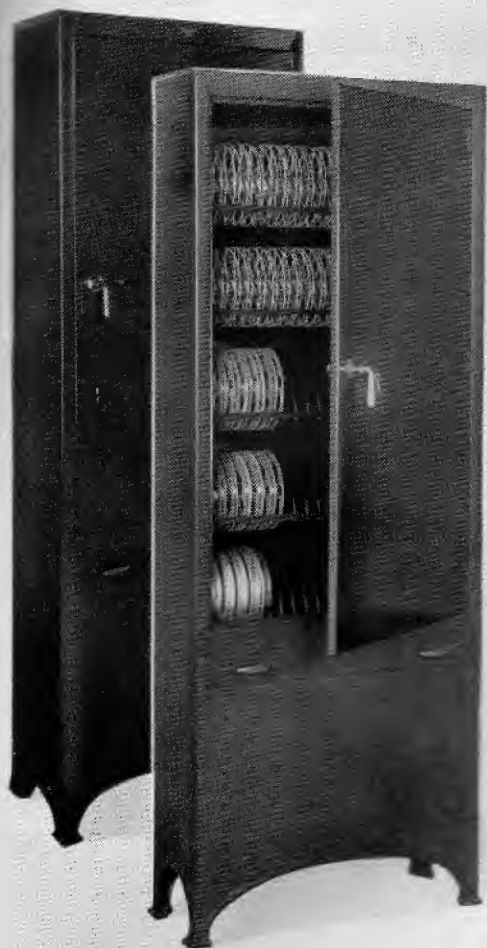

Every ounce of material used, excepting the battleship linoleum and brass binding, is steel—so it's fire-resistant.

DC-200

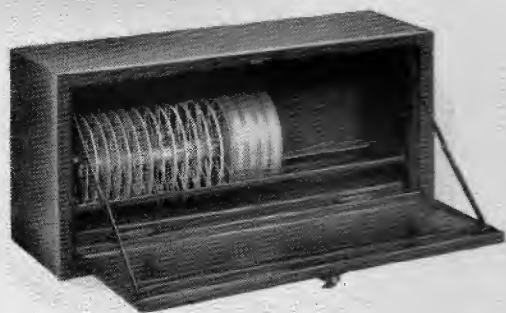

This illustration shows cabinet completely closed.

Quantity STORAGE CABINETS for 16mm Film

MM-100 (with separators—holds 100 reels).....\$100.00
 MM-101 (without separators—holds 140 reels) 90.00

and 16mm FILM Must Be Measured

Neumade Services the Non-Theatrical
Field with Nothing but
High Quality Apparatus

HM-5-S
Single hub 16mm measuring
machine, for footage only.
\$35.00

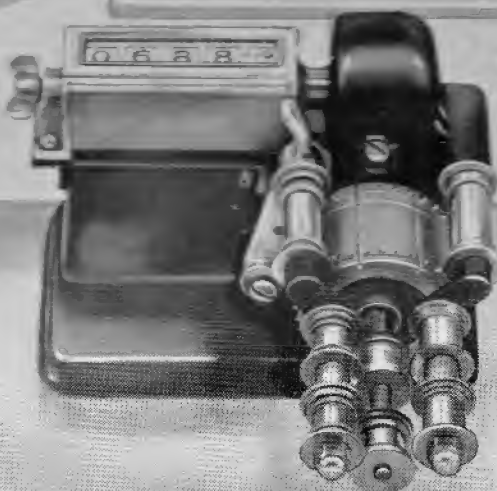

DS-16-D

Synchronizer type machine has counter for measuring footage and separate clock dial for measuring each frame. Double hub model illustrated.

Single Hub Model
\$125.00

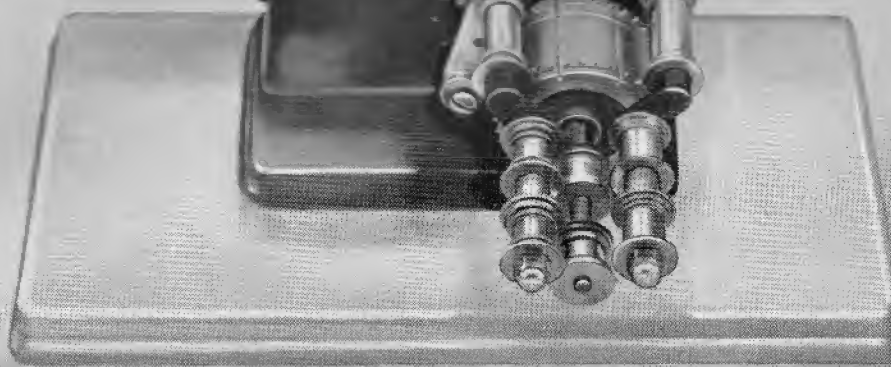

Double Hub Model
\$135.00

HM-5-D

Equipped with two sprockets. For measuring one or two films at the same time. Counter measures footage only.

\$55.00

HM-16 Combination Measuring Machine

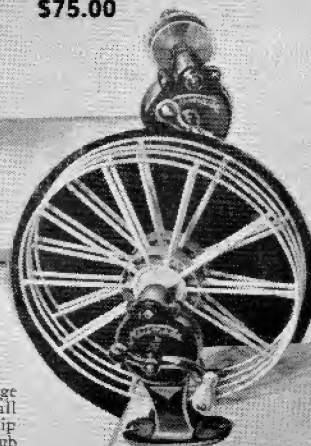

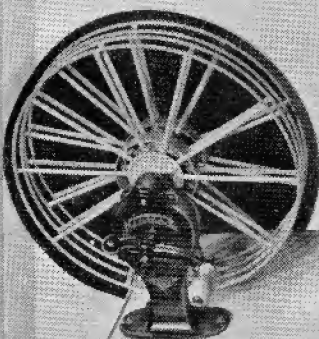

Equipped with one sprocket for 35mm and two for 16mm film. Checks both the smaller width film with the standard professional frame-for-frame, at the same time totalling the footage of the 35mm film.

\$75.00

Steel cast housings are black enamel. Sprocket hubs, rollers and other trim are chrome plated. Accurate patented counter supplied with each machine. Mounted on acid-resisting white porcelain light-reflecting base of generous size. Usually supplied with hubs having teeth on one side only which permits measuring sound film too. Two-sided hub for measuring silent film exclusively can be substituted at no extra charge.

Single and double hub machines in stock.

Multiple sprocket models made up special. Price on request.

**SYNCHRONIZING MACHINE
AND REWINDING UNIT**

Equipped with double hub machine which measures both footage and frames. Two geared ends synchro-dual 16mm rewinders, tall enough to take the largest reels in general use. Has friction clip which rides the shaft between the reels, leather faced friction hub and locking knurl nut at end of shaft to hold reels firmly in position. These devices insure even tension and pick-up. All mounted on a sub-base of hard wood and covered with acid-resisting light-reflecting white porcelain. Bottom is felt covered.

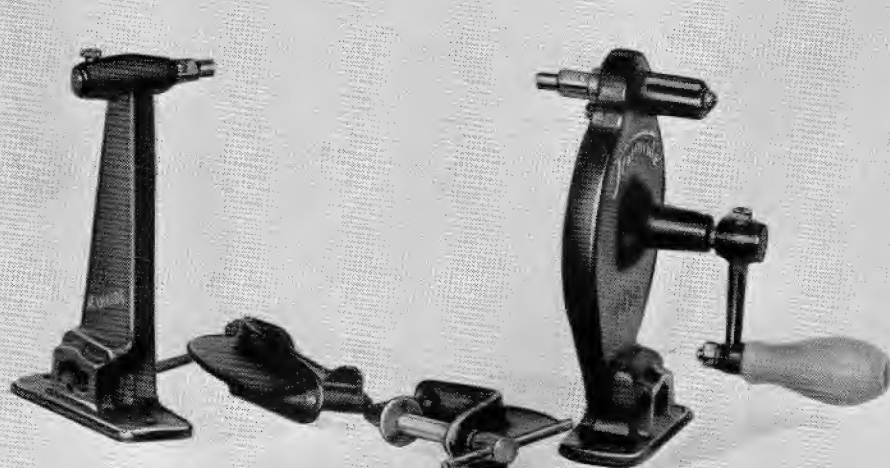

\$165.00

**HM-5 MACHINE
AND REWINDING UNIT**

Same as synchronizer unit with the exception that the HM-5-D measuring (footage only) machine is substituted.

\$80.00

16MM PAPER REEL BANDS

Heavy kraft paper waxed string tie. Stock printed—100-\$2.00; 1000-\$18.00. If name and address are to be imprinted, 1000 minimum quantity—\$20.00. Bands for 1600 ft. reels, stock printed—100-\$5.00; 1000-\$25.00. This size can also be specially imprinted.

BAKELITE CORE
for 16mm positive
or negative use.

\$.25

HUMIDOR CANS

In heavy spun aluminum or galvanized.

	Aluminum	Galv.
800 ft. capacity	\$2.50	\$2.00
1000 ft. capacity	3.00	2.25
1200 ft. capacity	—	2.50
1600 ft. capacity	3.50	3.00

16mm Splices Hold with GRISWOLD JUNIOR on the Job!

Same operating principle,
same fine results as in
all 35MM Models

This machine splices 16mm silent or sound film,
also 8mm width. 1/10" overlap for positive—
1/16" for negative. Specify type when ordering.

HM-6 \$15.00

TERMS AND CONDITIONS OF SALE

All merchandise sold f. o. b. our factory, Buffalo, N. Y.

Cash discount 2%, 10 days; 30 days net.

Prices subject to change without notice.

ORDERS

Order by catalogue number only.

Most Neumade Products finished in olive-gray baked-on enamel. Where color other than our standard finish is desired, an additional charge will be made.

No discount will be allowed on any order amounting to less than \$1.00 NET.

DAMAGE IN TRANSIT

All Neumade Products are packed with care to withstand transportation handling, and conform to carriers' regulations. We therefore cannot be responsible for damage in shipment. If you have reason to believe from the appearance of the packages that shipment is damaged or broken, do not accept same until proper notation on your bill for charges has been made by the carrier's agent as a protection in damage claim. If discovery of damage is made after prompt inspection of the contents, notify carrier immediately so that an official inspection can be made by them. We would be glad to handle any claim if all the data with letter from the carrier acknowledging inspection, is submitted to us.

RETURNED SHIPMENTS

Returned shipments will not be accepted unless authorized by us.

A 10% handling charge will be made on all goods returned for credit after ten days.
